Sean Matthew**English**
Programmer.

"You see, I went on with this research just the way it led me. That is the only way I ever heard of true research going. I asked a question, devised some method of obtaining an answer, and got, a fresh question. Was this possible or that possible? You cannot imagine what this means to an investigator, what an intellectual passion grows upon him!" **-H.G. Wells, The Island of Doctor Moreau**

Experience

10/'14 - Present	**Research Assistant**	Singapore University of Tech. & Design

Engaged in research related to natural language processing, specifically the creation of a "distant supervision" corpus for relation extraction.
